THANK YOU FOR PURCHASING A KARCHER PRESSURE WASHER

PLEASE READ THIS LEAFLET CAREFULLY BEFORE OPERATING YOUR MACHINE.

WHAT IS A PRESSURE WASHER?

A Pressure Washer is essentially a powerful electric motor driving a set of pistons that force water through a small nozzle, thus creating a pressurised jet of water. This provides the cleaning power behind the Karcher Pressure Washer.

A Karcher Pressure Washer can be used for an endless list of applications around the home and garden. It provides an efficient, economical and labour saving way of cleaning with excellent results.

All Karcher domestic pressure washers are designed to run from a suitable cold water supply although some models will accept a water inlet temperature of between 40 °C and 60 °C.

**Environmental Comment - Save water with high pressure.**
The Karcher Pressure Washer is environmentally friendly enabling you to reduce your water consumption compared to a normal garden hose. A definite advantage with a metered water supply

OR

with the added benefit of suction mode, water can be drawn from an open container such as a water butt.

10. ASSEMBLY
1. APPLICATIONS

The main applications for this product are DOMESTIC cleaning tasks:

- Cars, motorbikes, caravans, boats and bicycles
- Patio’s, fences, garden walls, pathways, driveways and house facades – particularly useful for cleaning block driveways
- Removal of algae and moss from roofs, brickwork and guttering
- Garden tools and machinery, furniture and barbecues
- Hygienic cleaning of animal pens and their surroundings

With the addition of Karcher accessories, the list continues .............

- Clearing blocked drains and pipes
- Removal of old paint and rust from garden furniture and gates
- Spraying insecticide onto trees, plants and lawns
2. SAFETY INSTRUCTIONS

BEFORE STARTING UP YOUR PRESSURE WASHER PLEASE CHECK YOU HAVE THE FOLLOWING:

We recommend you purchase these items from a reputable store

- RCD plug and socket that will interrupt electrical supply in an emergency

- A typical garden hose (minimum length 7.5 metres) with suitable hose connection (Hoselock/Gardena type) to match the coupling on the machine (hose and connector not supplied).

- The mains voltage and supply indicated on the Rating Plate of the machine corresponds with that of the power source

- The insulation of the supply cable is not damaged

- Only earthed sockets should be used

- If you are using an extension cable it must be completely unwound from the cable drum and be the correct diameter:

  10 meter length of cable should have a cross section of 1.5 mm²
  30 meter length of cable should have a cross section of 2.5 mm²

Safety Assurance

As an added precaution, your pressure washer is fitted with a safety locking device on the Spray Gun.

AFTER USE, ALWAYS REMOVE THE PLUG FROM THE SOCKET BEFORE CLEANING YOUR PRESSURE WASHER.
3. **GETTING STARTED**

3.1 **Contents**

Upon opening the carton, if you do not have all the items as detailed please contact the Customer Helpline on 01295 752200.

1. Carry Handle
2. Detergent Suction Tube
3. On/Off Switch
4. High Pressure Outlet
5. Inlet Water Connection (with Strainer)
6. Hosepipe Connector
7. Spray Lance with Double Nozzle
8. Spray Gun with Safety Lock Device (A)
9. High Pressure Hose
10. Mains Electric Lead with Plug

*Assembly see Page 19*
Please follow these instructions carefully for troublefree cleaning

Use the diagram on Page 6 for reference purposes

3.2 Water Connection

• The minimum length of supply hosepipe advised for maximum user convenience is 7.5 metres with a diameter of 12.5 mm (1/2") to avoid backpressure and any associated potential damage to your machine.

• Attach your supply hosepipe with its connector to the coupling on the machine (No. 6) and the other end should be connected to a suitable water supply

3.3 Electrical Connection

• Ensure the Power Switch (No.3) is in the “OFF” position before connecting the factory fitted Plug attached to the Mains Electric Lead (No.10) into an earthed socket.

If using an Extension Cable make sure it is completely unwound from the cable drum and is the correct diameter.
3.4 Detergent

Only cleaning agents recommended by Karcher (UK) Ltd. should be used. Unsuitable detergents could damage your Pressure Washer and the object being cleaned.

Recommended Detergents

1. The following cleaning agent may be used undiluted:
   Universal Cleaner .................................. Profi RM 555 ASF

2. The following cleaning agents are available as concentrate and must be diluted with 9 parts of water (1 : 9) before use:
   Universal Cleaner .................................. Profi RM 555 ULTRA
   Automotive Cleaner ............................... Profi RM 565 ULTRA
   House & Garden Cleaner .......................... Profi RM 570 ULTRA
   Boat Cleaner ........................................ Profi RM 575 ULTRA

3. Detergent tablets are also available from some stores
   Karcher Clean Tabs (10 tablets per box)
   10 Tablets dissolved in clean water provide 5 litres of cleaning detergent.

DETAILS OF THE FULL RANGE OF DETERGENTS AND CHEMICALS ARE AVAILABLE BY CALLING THE KARCHER CUSTOMER HELPLINE ON 01295 752200
4. OPERATING YOUR PRESSURE WASHER

*If you have followed all the instructions so far, you are now ready to have fun cleaning the KARCHER way!!!*

- Turn on the supply water and press the Spray Gun lever (No.8) until the water flows freely and removes all air locks from the hoses.

- You may now attach the Spray Lance (No.7) or required accessory to the Spray Gun.

  *All accessories are bayonet fit, simply push in and twist until they click into position!*

- Once water is flowing through the machine, you may now switch on your Karcher Pressure Washer using the Power Switch (No.3).

- You can choose between two modes of operation on the Spray Lance (No.7) by rotating the nozzle end.

  **High Pressure setting** ................. A 25° high pressure flat jet
  **Low Pressure setting** ................. A low pressure jet, for operation with detergent

  *ONLY ROTATE THE DOUBLE NOZZLE WHEN THE TRIGGER GUN IS CLOSED*

**WHEN USING YOUR KARCHER PRESSURE WASHER ON THE HIGH PRESSURE SETTING, THE RECOMMENDED WORKING DISTANCE BETWEEN THE NOZZLE AND THE OBJECT OR SURFACE TO BE CLEANED IS 30 CM.**

- IT CAN BE CLOSER IF REQUIRED FOR PATIOS OR MASONERY

It is your responsibility to check the suitability of the surface to be cleaned. **Karcher (UK) Ltd.** cannot be held responsible for any damaged caused.
4.1 High Pressure Operation

• Ensure the Spray Lance with the Double Nozzle (No.7) is attached securely to the Spray Gun (No.8) and the nozzle is set to the required jet.

• Aim the lance towards the object to be cleaned making sure the recommended working distance is used for reference (See Page 9). Release the safety ratchet on the Spray Gun and squeeze the trigger.

• Switch on the pressure washer (No.3)

_The pressurised water jet alone is capable of fulfilling most cleaning tasks around the garden or on building work but detergent and wash brush are advantageous when cleaning vehicles or other paint finishes._

4.2 Low Pressure Operation

• Dilute the detergent in a suitable container to the required concentration before using. (The correct dilution is dependent on the degree of soiling of surface and is best determined by experience).

• Hang the Detergent Suction Tube (No.2) in the Detergent container.

• Set the nozzle to the Low Pressure Setting.

_Always ensure the Spray Gun is closed before changing the nozzle setting_

• Aim the nozzle towards the object to be cleaned, release the Safety Locking Device on the Spray Gun and squeeze the trigger to apply the detergent to the working area.

• Switch on the pressure washer (No.3)

• To rinse the detergent away, close the trigger, increase the nozzle setting towards High Pressure setting. _No detergent can be drawn in with a high working pressure._ Spray with the required jet spray setting until no trace of detergent can be found.
4.3 **Low Pressure Operation with Brush (not included)**

When cleaning surfaces with a grease contamination - typically car paintwork that always has a greasy traffic film covering. Follow the procedure of:

- Washing loose dirt away with the clean water high pressure spray.
- Apply the detergent in low pressure mode by removing the bayonet fit spray lance and fitting the Washing Brush (Part No. 6.903-275) to the Spray Gun.
- Leave for 2-4 minutes for the detergent to have maximum effect.
- With or without the pressure washer switched on, brush down the surface being cleaned, this physical agitation removes all trace of traffic film. Finally revert to the high pressure operation with the Spray Lance and complete the wash down.

**We recommend the following cleaning method:**

**Step 1:**
Remove loose dirt by washing over the surface to be cleaned with the high pressure jet.

**Step 2:**
Spray on the detergent and leave for 1-4 minutes, so assisting the easy removal of fine dirt and associated greasy adhesions.

**Step 3:**
Finally, spray off the loosened dirt with the high pressure spray.
4.4 End Of Operation

ALWAYS REMEMBER TO RINSE YOUR PRESSURE WASHER AFTER USING DETERGENT BY HANGING THE DETERGENT SUCTION TUBE IN A CONTAINER WITH CLEAN WATER AND RUN THE PUMP FOR APPROXIMATELY ONE MINUTE IN LOW PRESSURE SETTING.

*In the event of a break of 5 minutes in the operation of your Karcher Pressure Washer, always switch off the pump to avoid damage due to overheating.*

- Switch off the pressure washer by the Power Switch (No.3) and unplug the Mains Electric Lead (No.10) from the socket
- Close the water inlet (tap) and disconnect the hosepipe
- Release the trigger to remove all pressure from the machine and then secure the trigger with the Safety Locking Device to prevent accidental opening.
5. CARE AND MAINTENANCE

To ensure the prolonged life and troublefree use of your Karcher Pressure Washer we strongly recommend routine maintenance of the following:

Double Nozzle (No.7)
Visually check to see if the nozzle is blocked by dirt or grit, if so, remove the dirt from the nozzle hole with a needle and rinse with water from the front.

Water Connection (No.5)
After every 50 or so periods of operation, remove the filter with flat nosed pliers and check that there are no obstructions - if any are present rinse clean.

IMPORTANT

1. REMEMBER FROST WILL DAMAGE YOUR KARCHER PRESSURE WASHER IF IT HAS NOT BEEN COMPLETELY EMPTIED OF WATER AFTER USE. ALWAYS STORE IN A FROST FREE AREA.

FROST DAMAGE IS NOT COVERED BY WARRANTY.

2. The high pressure hose of your Karcher Pressure Washer should not be mistreated. It is designed to withstand high pressure operation but if the hose is damaged it may balloon and burst during use if vehicles are run over it or it is pulled across sharp or abrasive edges.

IT IS THE SECOND MOST EXPENSIVE ELEMENT OF YOUR PRESSURE WASHER - PLEASE TAKE CARE OF IT.
6. ACCESSORIES

A wide range of accessories are available for your Karcher Pressure Washer making it an even more useful tool around the house, garden or garage.

4.763-228 Dirt Blaster/Rotary Jet  
A rapidly rotating pencil jet used to remove loose paint, stubborn algae and moss from hard surfaces.

4.760-269 Triple Nozzle Lance  
An integral fan jet, pencil jet and low pressure chemical jet in one unit allows optimal nozzle selection.

4.760-212 Underbody Lance  
Extended lance with angled end and upward firing jet for cleaning under cars, gutters etc.

6.903-276 Car Wash Brush  
Simple bayonet fitting attaches the brush to the hand gun, used in conjunction with RM555.

4.762-065 Rotary Wash Brush  
Ideal for car bodywork and windows as the water forces the brush to rotate enhancing cleaning power.

4.760-262 Extension Lance  
To add length to the standard lance.

2.637-729 Drain Kit (7.5 m Hose)  
2.637-767 Drain Kit (15 m Hose)  
A flexible hose with backwards firing high pressure jet to create turbulence and dislodge blockages.

2.637-728 Sandblaster  
Used to remove paint, rust and cement from metallic and stone surfaces by using a combination of high pressure water and sand.

4.760-265 Flexi Lance  
A lance which can be angled to any degree to clean hard to reach areas such as wheel arches etc.

2.637-755 Floor Cleaning Lance  
An extended lance fitted with three shrouded high pressure nozzles to provide a wide area of cleaning power without any splash back.

4.440-238 Suction Hose and Filter  
Used to provide a water supply to the unit where a mains water supply is not available by placing the kit into a water butt.

6.541-040 Trolley  
Eliminates the need to carry the pressure washer when the unit has no built in mobility.

6.964-006 Foam Nozzle  
A bayonet fit accessory that generates a low pressure detergent foam. This allows longer detergent contact time on the surface to be cleaned.

2.637-214 Water Pump Kit

9.300-051 25 Kg Grit

6.291-080 RM 555 (5 litre)

6.291-079 RM 555 (6 x 1 litre)

Most accessories will be available from your local store selling Karcher Pressure Washers. If they are not stocked, most stores will raise a special order for you. If you have difficulty obtaining accessories please contact the Karcher Spares Desk on 01295 752101.
6. SPARE PARTS

In the event that your Kärcher Pressure Washer requires a replacement part, please refer to the diagram below and order your spares by contacting the Kärcher Spares Desk on 01295 752101
7. PROBLEM CHECKLIST

The machine you have chosen is of the highest quality. If you experience a problem, please check the following chart before contacting the Karcher Customer Helpline on 01295 752200

8. AFTER SALES SERVICE

If your machine does not appear to be working correctly please refer to the **PROBLEM CHECKLIST**. If this fails to resolve the problem, or in the event of a breakdown please ring the **Karcher Customer Helpline on 01295 752200** during office hours. Please have ready the model number and date of purchase of your machine along with clear and concise details of the fault.

EU Declaration of Conformity

We hereby declare that the equipment described below conforms to the relevant fundamental safety and health requirements of the appropriate EU Directives, both in its basic design and construction as well as in the version marketed by us. This declaration will cease to be valid if any modifications are made to the machine without our express approval.

Product: High-pressure cleaner
Model: 1.072-xxx, 1.223-xxx

Relevant EU Directives:
EU Machinery Directive (98/37/EEC)
amended by 91/263/EEC, 92/31/EEC, 93/68/EEC

Harmonised standards applied:
DIN EN 55014-1:1999 DIN EN 60335-1 DIN EN 61000-3-2:1995

Appropriate internal measures have been taken to ensure that series-production units conform at all times to the requirements of current EU Directives and relevant standards. The signatories are empowered to represent and act on behalf of the company management.
